Chemical Peels

Chemical peels are a highly effective way to rejuvenate your skin by removing dead skin cells and stimulating collagen production. Opulence Chicago LLC offers peels in varying strengths to address concerns like acne scars, sun damage, hyperpigmentation, and fine lines. A consultation with a skincare expert will help determine the best peel for your skin type and goals. Regular peels can improve texture, reduce breakouts, and create a smoother, brighter complexion.

Microneedling

Microneedling is a minimally invasive treatment that uses tiny needles to create micro-injuries in the skin, stimulating the body's natural healing process and promoting collagen and elastin production. This treatment is ideal for clients looking to reduce fine lines, acne scars, and enlarged pores. With proper care, microneedling can lead to long-lasting skin improvement, leaving your skin firmer and more youthful.

Hydrafacial

The Hydrafacial is a popular choice for instant [Skin rejuvenation Chicago](#). LED Light Therapy

LED light therapy is an advanced treatment that uses different wavelengths of light to target skin issues like acne, inflammation, and signs of aging.
