ABOUT US

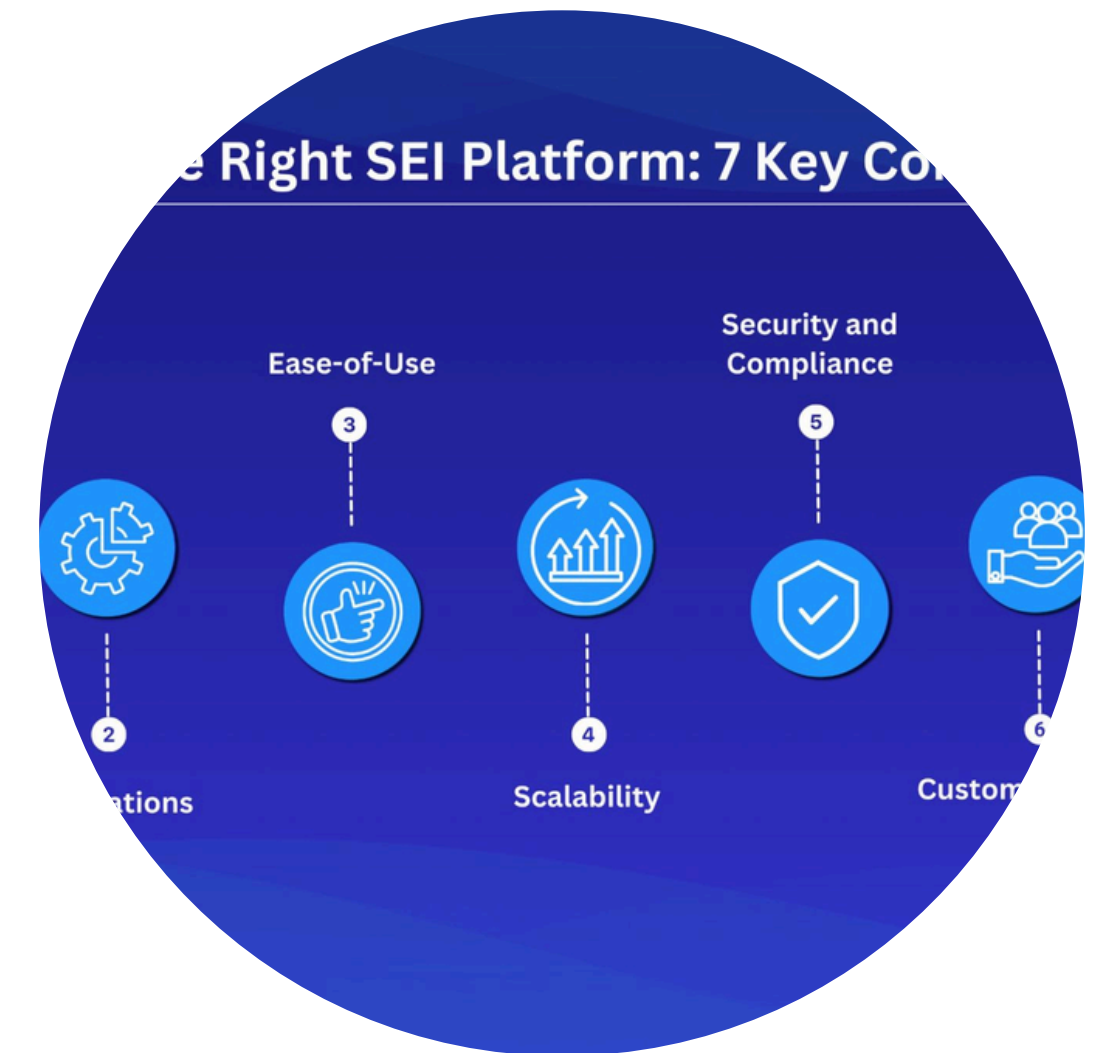

Findy, a global company headquartered in Tokyo, Japan, is dedicated to empowering software engineers to reach their highest potential. We provide career matching services for the tech industry and offer Japan's leading DevOps intelligence platform called Findy Team+. Going beyond just a simple metrics tool, Findy Team+ makes it easier to drive continuous improvement across the engineering organization – from developer workflows to the developer experience itself. With a variety of visualizations and analytics covering DORA, SPACE, and more, Findy Team+ enables software development teams to establish benchmarks, measure impact, and achieve DevOps excellence. Just connect your developer tools, such as GitHub, GitLab, and Jira, and within minutes have the insights you need to ship code faster and smarter.
